SUMMARY

Computer Science undergraduate specializing in Data Science, with a strong focus on Artificial Intelligence, Machine Learning, and full-stack software development. Experienced in developing AI-powered applications, scalable backend services using FastAPI, and modern web applications with Next.js and TypeScript. Skilled in machine learning workflows, data analysis, interactive data visualization using Power BI, RESTful API development, and database technologies including PostgreSQL and MongoDB. Passionate about leveraging AI, data-driven insights, and software engineering to build innovative, user-centered, and high-performance digital solutions.

CORE COMPETENCIES

- **Programming Languages** – Python | C | C# | Java | JavaScript | TypeScript
- **Web Technologies & Frameworks:** React.js | Next.js | Node.js | HTML | CSS3 | Tailwind CSS | FastAPI | Spring Boot | .NET
- **AI & Machine Learning:** TensorFlow | PyTorch | Hugging Face | ChromaDB | RAG | LLM Operations | Plotly | Google Colab
- **Desktop & Application Development:** Electron.js | WPF | .NET
- **Databases:** PostgreSQL | MySQL | MongoDB | PL/SQL
- **DevOps & Tools:** Git | GitHub | Docker | CI/CD | Postman | Vercel | VS Code
- **Design & Prototyping Tools:** Figma | Adobe Photoshop | Canva

PROJECTS

GradeVision AI – Student Performance Analytics Platform | [GitHub](#)

Technical Stack – Next.js (TypeScript), FastAPI, Python, PostgreSQL, Scikit-learn, Tailwind CSS

- Built a full-stack AI-powered student performance analytics platform featuring GPA prediction, student risk assessment, and interactive academic performance dashboards.
- Developed scalable RESTful APIs using FastAPI to integrate trained machine learning models with a modern Next.js frontend, enabling real-time prediction and analytics.
- Designed responsive dashboards with data visualizations and actionable insights to support academic performance monitoring and data-driven decision-making.

NeuroLabs – No Code Machine Learning Platform | [GitHub](#)

Technical Stack – Python, FastAPI, Electron.js, Plotly, Scikit-learn

- Contributed to the development of a no-code machine learning platform enabling users to build, train, and visualize machine learning models through an intuitive desktop interface.
- Implemented backend functionalities for data processing, model execution, and interactive visualizations using FastAPI, Python, and Plotly.
- Collaborated on frontend development, documentation, and workflow design to simplify machine learning concepts for beginners and non-technical users.

Portfolio AI – RAG Portfolio Assistant | [Live Website](#)

Technical Stack – Next.js (TypeScript), GSAP, FastAPI, LangChain, ChromaDB, Groq API, Hugging Face Embeddings

- Developed an AI-powered portfolio assistant using Retrieval-Augmented Generation (RAG) to answer user queries based on portfolio content, projects, and professional experience.
- Built a scalable FastAPI backend integrating LangChain, ChromaDB, and Groq LLMs to provide context-aware responses using semantic document retrieval.
- Designed a modern chatbot interface in Next.js with responsive UI, real-time interactions, and seamless integration between the frontend and AI backend.

RevouX – Official Media Unit Website | [Live Website](#)

Technical Stack: Next.js, React.js, TypeScript, Tailwind CSS, Framer Motion, Vercel

- Developed the official website for the Media Unit of the Rotaract Club of the University of Kelaniya, delivering a modern, responsive, and user-friendly digital platform.
- Built reusable UI components and interactive animations using Next.js, React.js, TypeScript, Tailwind CSS, and Framer Motion, ensuring an engaging experience across desktop and mobile devices.
- Implemented a contact form that allows visitors to send inquiries directly to the administrator's email, while optimizing website performance and deploying the application on Vercel.

Ravana Labs – Full-Stack Digital Media Marketing Platform | [inprocess](#)

Technical Stack – Next.js, TypeScript, FastAPI, PostgreSQL, Tailwind CSS

- Developing a full-stack web platform for Ravana Labs to establish a modern digital presence with scalable architecture and responsive user interfaces.
- Designing a high-performance platform following modern UI/UX principles while integrating backend services to support future business growth and digital marketing operations.

EDUCATION

Bsc. in Computer Science (Hons)

University of Kelaniya, SriLanka

Specialize in Data Science (Current GPA - 3.74)

2023 - Present

G.C.E. Advanced Level – 1A 2Bs

Royal College, Colombo 07

2019 - 2022

CERTIFICATES

- [What is Data Science | coursera](#)
- [Python for Data Science, AI & Development | coursera](#)
- [Introduction to Artificial Intelligence | coursera](#)
- [Web development fundamentals | Open.UoM](#)

ACHIEVEMENTS

- LAUNCH'26 - 1st Runners-Up Team DeviX, National level inter university Hackathon organized by the IEEE Computer Society of University of Kelaniya)
- IdeaForge - 2nd Runners-Up An Ideathon(Organized by Computer Science Students' Association, University of Kelaniya)
- Best 2nd Year Group Project Recognition - Faculty Research Symposium
- IX'26 Designathon - Secured Top 20 Finalists (Organized by IEEE Student Branch of IIT)
- Brandin'26 - Secured Top 06 (Organized by Rotaract District 3220)

EXTRA-CURRICULAR

- Digital Media Co-Director - Rotaract Club of University of Kelaniya (2025–26)
- Digital Media Manager - Computer Science Students' Association, UOK (2025–26)
- SLUG XV Men's Basketball Team Player
- Public Visibility Lead - IEEE Computer Society Chapter (2024–25)
- Member - IEEE Computer Society Chapter
